Advertising Summary:

The Department of Health Outcomes and Biomedical Informatics (HOBİ) participates in multiple Medicaid funded or related projects, supporting state quality initiatives and conducting policy research using Medicaid and other health data sources.

This position is part of a data management team responsible for data warehousing, management and analysis.

The analyst will design and manage data systems that include multi-sourced health, healthcare system, and social or population data sets. Analyses conducted will apply accepted principles and theories of the descriptive and inferential statistics and participation in interpretation and presentation of results is expected. This position may oversee statistical analyses conducted by graduate student research assistants and other staff. Communication of complex data and analyses to lay and industry audiences, in meetings and presentations and in written reports is required. Contributions to scientific reports, conference papers, and journal articles is expected.

Minimum Requirements:

Masters degree in an appropriate area and two years of relevant experience; or a bachelor's degree in an appropriate area and four years of relevant experience.
